2 Gandinga Landscape Reserve
In ancient times, Gandinga was an important cultural, administrative and defensive object. In written sources, it was first mentioned in 1253 in documents on the division of the Curonian lands. Archaeological finds indicate that this is the only place in Lithuania, where five mounds at once are located on a small area.

3 Žemaitija (Samogitian in English) National Park

The park was founded in 1991 and covers the area of 21,745 ha. Plateliai lake is the deepest and largest, and probably also the most beautiful lake in Samogitian region, with islands, peninsulas and bays. The lake is surrounded by hillsides and forests. A relic fish Coregonus lavaretus holtsatus Thienemann nat. Platelensis lives in the lake. The abundance of mounds, idolatrous hills and shrines reflects the ancient culture. But chapels and crucifixions, found on roadsides and in fields can slightly open the lifestyle and traditions of local residents. These samogitian traditions further emphasize the significance of the Shrove Tuesday (*Užgavėnės in Lithuanian*) which is still being celebrated.

4 Plateliai
The city is mentioned in historical sources from the 15th century. It was located on the Šventorkalnis peninsula, and at the end of the 17th century it was moved to the place where it is located up to now. There is St. Peter and Paul church in the town, Plateliai manor, once owned by a count family Choiseul-Guifier of French origin. The largest ash tree in Lithuania grows in the manor park. In the downtown, there is crucifixion of St. Florian, monuments to the Decade of Independence of Lithuania (1918–1928), the Lithuanian Liberation Army (1941–1944–1953) and the monument to the memory of Balys Korza, martyr of the Rainiai massacre. The city of Plateliai, where *Užgavėnės* has been celebrated since ancient times, was recognized in 2008 as European Destinations of Excellence (EDEN), largely due to its unique cultural traditions.

5 Litvaks Memorial Garden
Here, the outlines of Lithuania are indicated by bushes that bloom all year round, and in places where in 1941–1944 Jewish communities were destroyed are marked with apple trees forged from metal by the craftsman A. Platakis. Apples on the apple trees symbolically perpetuate families living in the communities. The Karelian granite columns are installed in places on the map in which the world famous Litvaks (Jews living in Lithuania were called Litvaks) were born.

6 Leonardas Černiauskas art gallery – creative workshops
